**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims, 3, 10 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Xue et al. (Patent No.: US 6,782,414 B1), hereinafter "Xue".

5. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

6. As to claim 3,10 and 17 (product, method, system etc.) Xue discloses, if a failed delivery e-mail message is received, setting an indicator associated with an address of an addressee corresponding to the failed delivery message (Xue, Fig.8D, Element-828, 834 and 842, Col.12, lines 42-60, where stop icon is associated with failed delivery messages corresponding to the failed email delivery addresses); and displaying said address in conjunction with a perceptive cue in response to said indicator being set (Xue, Fig.5 and Fig.8D, Element-828, 834 and 842, Col.12, lines 42-60, where stop icon is associated with failed delivery messages corresponding to the failed email delivery addresses and messages are still waiting to be delivered);

wherein, if said indicator is set (Xue, Fig.8D, Element-828, 834 and 842, Col.12, lines 42-60, where stop icon is associated with failed delivery messages corresponding to the failed email delivery addresses), said indicator is operable for clearing in response to said address becoming accessible (Xue, Fig.3, Elements 303-306, Col. 8, lines 30-37, where 304 is reconciled module means if address matches than in next step indicator or status gets updated); and

clearing said indicator in response to subsequently receiving an e-mail originated from the address of the addressee corresponding to the failed delivery

message (Xue, Fig.3, Elements 301-306, Col.8, lines 38-57, where at step-305 status gets updated after address becomes accessible or reconciled).
